2. Bowel Prep Dosing Regimens

Different dosing regimens have been described in the literature for effective bowel preparation prior to colonoscopies.

- a. Traditional dosing refers to a full bowel prep regimen that is completed the evening prior to the colonoscopy.
- b. Split-dose bowel prep dosing begins the evening prior to the procedure and the regimen is completed the morning prior to the procedure.
- c. Same-day dosing describes the bowel regimen that is started and completed on the same day of the procedure.

*9. Does the office have different bowel prep dosing depending on the time of the day that the colonoscopy is scheduled for?

- Yes
- No

Bowel Preparation Dosing Regimens 2013

***10. What dosing is currently used for clients scheduled for morning colonoscopies (prior to 12 p.m.)?**
