

Maryland Cancer Collaborative (MCC) Organizational Membership Benefits

Cancer Centers

- Implementation of Maryland Comprehensive Cancer Control Plan strategies could potentially be conveyed as hospital community benefit services (depending on the specific activity) when reporting to the HSCRC, and/or may be used to meet Commission on Cancer (CoC) standards.
- Networking with other cancer health care providers on best practices and CoC requirements.
- Access to educational resources, funding, training, and employment opportunities from other member organizations.

Community and Nonprofit Organizations

- Collaboration with other organizations with similar missions on cancer control projects to combine resources and maximize impact.
- Access to educational resources, funding, training, and employment opportunities from other member organizations.
- Recognized/featured on MCC website and social media.

Academic Institutions

- Access to cancer control projects for student interns.
- Inspiration from MCC projects and/or the Maryland Comprehensive Cancer Control Plan for research projects and/or journal manuscripts.
- Access to educational resources, funding, training, and employment opportunities from other member organizations.

Professional Associations

- Opportunity to shape MCC priorities and activities.
- Access to educational resources, funding, training, and employment opportunities from other member organizations to share with members.
- Potential recruitment of new members.

Major Employers and Businesses

- Regular updates on cancer control activities throughout Maryland, and access to educational resources and training opportunities shared via monthly e-newsletter and social media.
- Strengthening of company, employee, and client image; employees see that business owners care about employee health and wellness.
- Financial benefit of incorporating MCC and other priorities from the Maryland Comprehensive Cancer Control Plan into worksite health programs and/or benefits.
