

2004 Claritas Data

These data are received from the Health Resources Services Administration's (HRSA's) Office of Shortage Designation (OSD) through their database, Application Submission and Processing System (ASAPS). ASAPS was created by OSD for use by all of the nation's Primary Care Offices (PCOs) in submitting shortage designation applications. OSD pays the Census Bureau for demographic data supplied to the database. This database is only available to the Maryland Primary Care Office for the state of Maryland.
